Met Office Aberdeen Meteorologist's View

A hazardous day in the hills due to combination of gale force winds, sub-zero temperatures drifting and blowing snow.

Forecast for Saturday 06 Feb 2021

Weather: Mainly cloudy with further snow showers and temporary blizzard conditions. The showers most frequent and heavy at times over the south and east of area with drier, brighter conditions in the west. Another bitterly cold day with easterly gales leading to drifting of fresh snow and blowing of existing snow.

Maximum wind: Easterly winds with average speeds of 30 to 40mph and gusts 55mph.

Chance of cloud free mountain/hill tops above 800m: 20% in west of area, little chance in the east.

Visibility: There will continue be extensive cloud cover well down the hills and blowing snow leading to whiteout conditions. Pockets of good visibility in more sheltered western areas with clouds lifting above a few of the tops.

Temperature: **Glens:** Minus 1 Celsius rising briefly to plus 1 Celsius.
At 800m: Minus 4 Celsius.
Freezing level: Temperatures below freezing at most levels.
